CBTL
One touch. One perfect cup.

KALDI Model **S04**

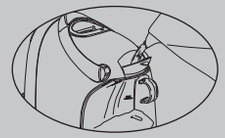
QUICK REFERENCE GUIDE

Congratulations on your new *CBTL™* Single Serve Beverage System.
For first time use, please follow these steps.

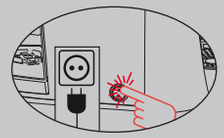
INITIAL INSTALLATION & SET UP

Step 1 Carefully remove your new system from the box.

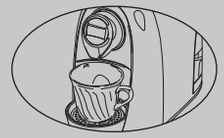
Step 2 Fill water tank to maximum fill level.



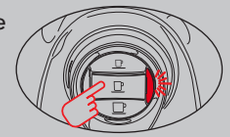
Step 3 Plug into grounded outlet and turn power switch on.



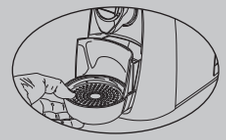
Step 4 Place cup on drip tray.



Step 5 All three beverage buttons and the red light should be blinking. Press the center button once and wait approximately 2 minutes for machine to dispense water from spout. The 3 beverage buttons will blink while the red light stops blinking to confirm the completion of this initial priming cycle. Repeat this step only if red light continues to blink.



Step 6 After the priming cycle is complete, empty the cup and water from the used capsule drawer and then replace. The 3 beverage buttons will stop blinking to confirm that the machine is heated and ready to prepare your beverage.



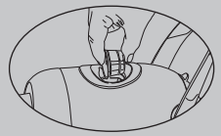
USING YOUR SYSTEM

Step 1 Select preferred capsule for brewing: *CBTL™* Capsules include espresso, brewed coffee and tea.
(see "CBTL™ Capsule Overview" section for flavor descriptions).

For more detailed information, refer to the User Manual.

11CBV_HF_QuickUserS04_v.2.indd 1 4/5/11 10:45 AM

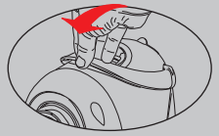
Step 2 Raise the lever and gently place your selected *CBTL™* Capsule into the capsule compartment opening.



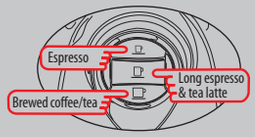
NOTE: Do not remove or puncture capsule foil.

CAUTION: Do not place fingers or other objects into the CBTL™ Capsule compartment opening.

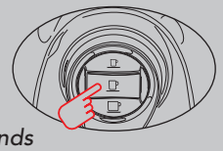
Step 3 Lower the lever completely. Wait for beverage buttons to be steadily lit.



Step 4 Identify the appropriate beverage button based on your beverage selection.



Step 5 Push button. Brewing will begin in approximately 3 seconds, dispensing beverage into cup on drip tray (brewing process takes approximately 1 to 3 minutes depending on choice of beverage).

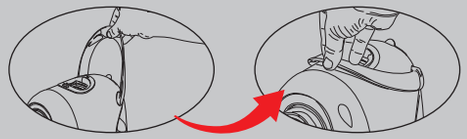


NOTE: Holding the button down for more than 2 seconds may recalibrate the machine's ideal beverage settings.
CAUTION: Extremely hot water is involved in making your perfect cup.

DO NOT lift lever, open brewer assembly/water tank or place fingers under beverage dispensing area of drip tray while brewing.

Step 6 Carefully remove your hot cup of delicious *CBTL™* espresso, brewed coffee or tea from the drip tray.

Step 7 Raise and then lower lever to eject used capsule into drawer. Remove and dispose of the used capsule from used capsule drawer.



CAUTION: Capsule will be hot.

Savor your hot, fresh beverage just like those you enjoy at any *The Coffee Bean & Tea Leaf®* coffee houses!

CBTL™ CAPSULE OVERVIEW
